CONTENTS.

FARMERS' BULLETIN NO. 426.—CANNING PEACHES ON THE FARM. Page.

Introduction 5
Extent and location of the peach-canning industry 6
Principles underlying successful peach canning 7
Equipment 8
Handling the fruit for canning 19
Marketing the canned product 26

FARMERS' BULLETIN NO. 427.—BARLEY CULTURE IN THE SOUTHERN STATES.

Introduction 3
Varieties of barley grown in the South 3
Soils adapted to the crop 5
Fertilizers for barley in the South 5
The use of green manures 6
Preparation of the soil 7
Sowing the seed 9
Harvesting and thrashing barley 10
Uses of the crop 11
Diseases of barley 13
Insects that attack barley 13
Statements of southern seedsmen regarding barley 14
Statements of southern farmers regarding barley 14
Summary 15

FARMERS' BULLETIN NO. 428.—TESTING FARM SEEDS IN THE HOME AND IN THE RURAL SCHOOL.

Introduction 3
Seed trade conditions 4
Purpose of seed tests 9
Seeds especially needing to be tested 10
Ease of making practical tests 10
Apparatus used in making tests 11
Distinguishing characters of seeds 15
Impurities of farm seeds 16
Details of making seed tests 29
Testing particular kinds of seeds 32
Summary 47

FARMERS' BULLETIN NO. 429.—INDUSTRIAL ALCOHOL.

Alcohol and denatured alcohol defined 5
The denatured-alcohol law 6
Denaturants and denaturing 9
Materials which may serve as sources of alcohol 9
Manufacture of alcohol 20
Governmental control of a small denatured-alcohol distillery 30
Factors influencing the cost of manufacturing alcohol 31
Conclusions 32

FARMERS' BULLETIN NO. 430.—EXPERIMENT STATION WORK, LXI.

Unusual *vs.* standard fertilizers 5
Symptoms of disease in plants 6
The premature dropping of figs in the South 7
Condimental feeds 7
Feeding the dairy calf 8
Defects in cottage cheese 10
The Iowa silo 11

FARMERS' BULLETIN NO. 431.—THE PEANUT. Page.
Introduction 5
Soil and climatic requirements of the peanut 6
Preparation of the soil 8
Fertilizers and preparatory crops 9
The seed and its selection 12
Time and methods of planting 14
General cultivation 16
Harvesting 17
Picking and cleaning 22
Varieties of peanuts 26
The uses of the peanut 30
Use of the peanut on the farm 34
Insects injurious to the peanut 37
Diseases of the peanut 37
Conclusions 38

FARMERS' BULLETIN NO. 432.—HOW A CITY FAMILY MANAGED A FARM.
Introduction 5
Description of the farm 6
Capital and other resources 7
Arrangement of the fields 7
Cropping system 8
Water supply and sewerage 9
Buildings 9
Labor 9
Family discipline and occupation 11
The housework problem 12
The farm garden 12
The orchard 14
Woodland and permanent pasture 15
Stock 15
Tillage 16
Fertilizers 16
Financial record of the farm 17
Corn and wheat 20
What the farm has been made to accomplish for the family 21
Social and agricultural problems satisfactorily solved 23
A serious problem 25
Farm implements and their cost 27

FARMERS' BULLETIN NO. 433.—CABBAGE.
Introduction 5
Cabbage as a truck crop 6
Cabbage as a market-garden crop 14
Cabbage as a farm crop 17

FARMERS' BULLETIN NO. 434.—THE HOME PRODUCTION OF ONION SEED AND SETS.
Introduction 5
Home production of onion seed 6
Production of onion sets 12
Enemies of the onion 22
Conclusions 24

FARMERS' BULLETIN NO. 435.—EXPERIMENT STATION WORK, LXII.
Water required for crops on rich and poor soils 5
Burning lime on the farm 6
Growing tomatoes for the canning factory 8
Lime sulphur as a fungicide 12
Market classes and grades of meat 16
Keeping poultry free from lice 20
Neufchatel cheese 21

FARMERS' BULLETIN NO. 436.—WINTER OATS FOR THE SOUTH.
Introduction 3
Production of oats in the Southern States 3
Value of a winter grain crop in the South 5
Fall-sown compared with spring-sown oats 6
Varieties of winter oats 9
Sections where winter oats can be grown 12

FARMERS' BULLETIN No. 436.—WINTER OATS FOR THE SOUTH—Continued. Page.
Soils and fertilizers for oats 14
Winter oats in the rotation 17
Preparation of the land for oats 18
Preparation of the seed 19
Sowing the seed 20
Treatment of the land after seeding 23
Spring seeding of winter oats 24
Weeds 24
Harvesting the crop 25
Yields 26
Improvement of the crop 26
Insects and diseases 27
Feeding value of oats 27
Feeding the grain to stock 28
Oat straw 29
Oats as hay and pasture and for other purposes 29
Summary 30

FARMERS' BULLETIN No. 437.—A SYSTEM OF TENANT FARMING AND ITS RESULTS.
Introduction 3
Why tenant farms deteriorate 4
Advantages and disadvantages of tenant farming 4
Fundamental principles of tenant farming 5
An example of tenant farming 6
Systems for tenant farms 20

FARMERS' BULLETIN No. 438.—HOG HOUSES.
Introduction 7
Prevailing conditions poor 8
Cost of housing pigs 9
Varieties of hog houses 10
Hog cots or individual houses 19
Hints on construction 22
Where to place windows in hog houses 24

FARMERS' BULLETIN No. 439.—ANTHRAX, WITH SPECIAL REFERENCE TO ITS SUPPRESSION.
Nature and history of the disease 5
Forms of the disease 8
The anthrax bacillus 9
Methods of controlling infectious disease 9
Vaccination as a preventive 11
Other preventive measures 15

FARMERS' BULLETIN No. 440.—SPRAYING PEACHES FOR THE CONTROL OF BROWN-ROT, SCAB, AND CURCULIO.
Introduction 5
Brown-rot 7
Peach scab 10
The plum curculio 13
Results of spraying experiments and demonstrations during 1910 21
Experiments in West Virginia, 1910 26
Experience of fruit growers 29
Effect of spraying on the quality of the fruit 31
Effect of the self-boiled lime-sulphur wash on scale insects 32
Preparation and use of the spray 33
Schedule of application 38

FARMERS' BULLETIN No. 441.—LESPEDEZA, OR JAPAN CLOVER.
Introduction 5
Lespedeza for pasturage 6
Lespedeza as a farm crop 8
Harvesting lespedeza 14
Possibility of extending the lespedeza-producing area 16
Summary 18

FARMERS' BULLETIN No. 442.—THE TREATMENT OF BEE DISEASES.
Introduction 5
The brood diseases of bees 5
The diseases of adult bees 20
Publications of the Department of Agriculture on bee diseases 22

FARMERS' BULLETIN NO. 443.—BARLEY: GROWING THE CROP. Page.
Introduction 3
Origin and early history of barley 3
Botanical characters 4
Introduction of barley into the United States 8
Barley-producing areas of the United States 10
Soils adapted to the crop 11
Fertilizers and manures 13
Barley in the rotation 16
Alkali resistance of barley 20
Drought resistance and water requirements 20
Preparation of the land 21
Sowing the seed 26
Treatment after seeding 29
Harvesting the crop 30
Storing the grain 33
Variety trials 33
Yield of barley compared with that of other cereals 41
Sowing barley and oats together for grain 42
Diseases affecting barley 42
Insects injurious to barley 44
Improvement of the crop 45
Summary 47
FARMERS' BULLETIN NO. 444.—REMEDIES AND PREVENTIVES AGAINST MOSQUITOES.
Introduction 5
Protection from bites 5
Smudges and fumigants 7
Apparatus for catching adult mosquitoes 9
Remedies for mosquito bites 9
Abolition of breeding places 9
Drainage measures 13
Destruction of larvæ by treatment of breeding places 13
The practical use of natural enemies of mosquitoes 15
Deterrent trees and plants 15
FARMERS' BULLETIN NO. 445.—MARKETING EGGS THROUGH THE CREAMERY.
The usual method of marketing eggs 5
How eggs are marketed through a Minnesota creamery 7
Advantages of the system 10
Similar systems in other localities 12
Conclusion 12
FARMERS' BULLETIN NO. 446.—THE CHOICE OF CROPS FOR ALKALI LAND.
Purpose of the bulletin 5
Chemical nature of alkali 6
Reasons for the appearance of alkali 7
Effect of alkali upon plant growth 8
Crop plants adapted to different grades of alkali 12
Considerations governing the choice of crops for alkali land 15
Alkali resistance of the different crop plants 18
Conclusions 30
FARMERS' BULLETIN NO. 447.—BEES.
Introduction 5
Location of the apiary 6
Equipment in apparatus 9
Equipment in bees 12
Bee behavior 15
Directions for general manipulations 19
Spring management 26
Swarm management and increase 29
Preparation for the harvest 33
The production of honey 33
The production of wax 39
Preparations for wintering 40
Diseases and enemies 42
General information 44
Supposed injury of crops by bees 46
Journals and books on beekeeping 46
Publications of the Department of Agriculture on beekeeping 47

	Page.
FARMERS' BULLETIN No. 448.—BETTER GRAIN-SORGHUM CROPS.	
Introduction	5
The grain-sorghum belt	5
Importance of the grain-sorghum crop	8
Improving the grain sorghums	15
Give the boys a chance to select grain-sorghum seed	34
Summary	34
FARMERS' BULLETIN No. 449.—RABIES OR HYDROPHOBIA.	
Nature and characteristics of the disease	5
Cause of the disease	7
Symptoms	8
Post-mortem appearances	11
Transmission of the disease by milk and meat	11
Differential diagnosis	13
Distribution and prevalence	15
Prevention and eradication	20
FARMERS' BULLETIN No. 450.—SOME FACTS ABOUT MALARIA.	
Introduction	5
The disease and its cause	6
Method of infection	7
The malarial mosquitoes	9
Prevention and cure	12
